Year Founded

2019
Year Incorporated

Kenya
Headquartered

NCA
Certified Contractor

COMPANY OVERVIEW

Aqua Solar Technologies Ltd was founded in 2015 and formally incorporated in 2019 as a Private Limited Company under the Companies Act. We provide comprehensive civil engineering, electrical, water and solar services to clients across Kenya and beyond.

Our work spans a wide range of disciplines — from borehole drilling and solar installations to fabrication of steel tanks and towers, environmental impact assessments, and renewable energy solutions.

We proudly serve:

NGOs • Parastatals • Schools • Government Ministries • Counties • Private Companies • Real Estate Developers

Key Objectives

- Create employment & empower disadvantaged communities
- Deliver quality, value-for-money services with a satisfaction guarantee
- Foster economic growth & be the region's #1 contractor

VISION, MISSION & CORE VALUES

OUR VISION

To be a leading water resources development contractor of choice in the region — delivering excellence across solar, water and construction sectors.

OUR MISSION

To achieve maximum success in water well drilling even in unfavorable areas. We are committed to delivering high customer satisfaction through quality output, real value for money, and continual investment in our staff.

OUR MOTTO: "GREEN ENERGY FOR CLEAN FUTURE"

CORE VALUES

Efficiency

Delivering timely, optimal solutions

Reliability

Trusted to deliver every time

Value

Best quality at competitive cost

Professionalism

Expert teams, world-class standards

MANAGEMENT, STAFF & SERVICE STANDARDS

DIRECTORS

EG

Eng. George Aoko
Director

MG

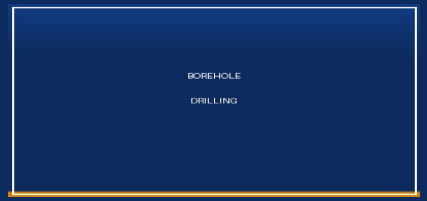

Mr. Gideon Maucha
Director

SERVICE STANDARDS

- Free written quotation within 24 hours
- Delivery within stipulated timeframe after signed agreement
- No interruption of work until job completion
- Highest quality materials used on all projects
- Follow-up after every job to ensure client satisfaction
- Satisfaction guaranteed for all work performed

OUR CORE SERVICES

Comprehensive solutions across water, energy & construction

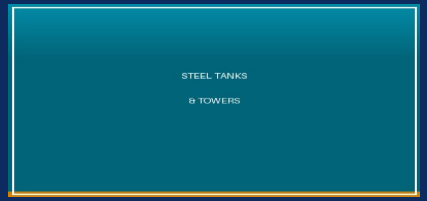

Borehole Drilling

Site surveys, hydrogeological studies, drilling, casing & test pumping

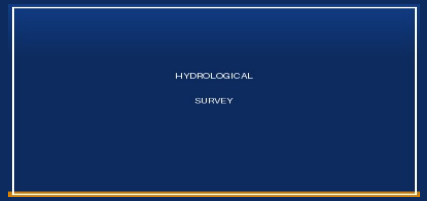

Solar Solutions

PV systems, solar pumps, street lighting,
battery storage & off-grid systems

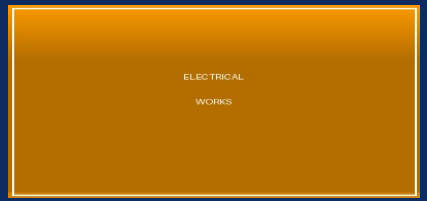

Steel Tanks & Towers

Fabrication & erection of elevated steel tanks and water towers

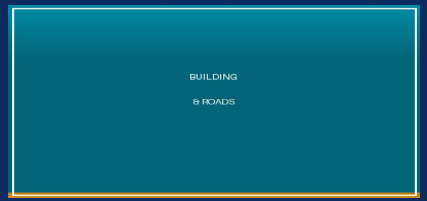

Hydrological Survey

Groundwater studies, aquifer mapping, EIA and groundwater monitoring

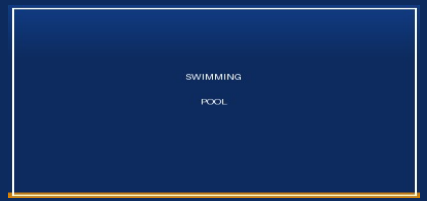

Electrical Works

Electrical engineering, wiring, control panels & pumping systems

Building & Roads

Civil engineering, road works, water & sewer systems design

Swimming Pool

Design, construction & maintenance of residential & commercial pools

Generator Services

Supply, installation & maintenance of standby & industrial generators

BOREHOLE DRILLING & WATER SERVICES

The Drilling Process

1. **Site Selection**
   Identify areas with high groundwater potential
2. **Hydrogeological Survey**
   Seismic, resistivity & GPR surveys by licensed hydrogeologist
3. **Drilling**
   Rotary, percussion or air-rotary drilling methods
4. **Casing Installation**
   Steel/plastic plain & slotted casings to protect the borehole
5. **Gravel Packing**
   Filters fine particles to prevent water contamination
6. **Test Pumping**
   24hr constant discharge to determine yield & pump sizing
7. **Water Testing**
   Physical, chemical & bacteriological quality analysis

Additional Water Services

Pump Installation & Repair
Submersible & surface pump systems

Borehole Rehabilitation
Maintenance, servicing & pump replacement

Water Quality Testing
Full lab analysis – physical, chemical, bacteriological

Hydrogeological Survey
Aquifer mapping, groundwater recharge studies

Environmental Impact Assessment
EIA services for project decision-making

Water Pump Installation
Submersible & surface pumping solutions

SOLAR & RENEWABLE ENERGY SOLUTIONS

Solar PV Systems

Residential, commercial & industrial photovoltaic systems — roof-mounted, ground-mounted & carport installations

Solar Water Pumping

Solar-powered submersible & surface pumps for boreholes, irrigation & water supply in off-grid locations

Off-Grid Solar Systems

Complete off-grid energy independence with battery storage for remote communities and facilities

Solar Water Heating

Efficient solar thermal heaters for residential and commercial hot water needs

Solar Street Lighting

Standalone solar-powered streetlights for roads, campuses, estates and rural areas

Battery Storage Systems

Advanced energy storage to maximize solar utilization and provide backup power during outages

WATER STORAGE & STEEL TOWER SOLUTIONS

Aqua Solar Technologies fabricates and erects a full range of water storage infrastructure to serve communities, schools, NGOs and commercial clients across Kenya.

Elevated Steel Tanks

Custom-fabricated galvanized steel tanks on structural steel towers — 5m³ to 100m³+ capacities. Designed for long-term durability in harsh environments.

Plastic Water Tank Towers

Cost-effective elevated plastic tank solutions on steel structures, ideal for communities and schools requiring reliable gravity-fed water supply.

Reinforced Concrete Tanks

Permanent, high-capacity underground or surface concrete tanks engineered for large water demand in institutional and industrial settings.

GRP Panel Tanks

Glass Reinforced Plastic modular panel tanks — flexible sizing, corrosion-resistant and easy to expand or relocate as needs grow.

ELECTRICAL ENGINEERING & CIVIL WORKS

ELECTRICAL ENGINEERING

Electrical Installation

Complete wiring, electrical systems, CCTV, solar power generation, UPS, AVR, MCCBs

Telecom & Networking

PABX, intercoms, LAN/network structured cabling, conference & PA systems

Mechanical Systems

Water tanks, pumping plant, hydraulic/compressed air systems

Control Systems

Control panels, pump controllers, automation & protection systems

CIVIL & BUILDING WORKS

Road & Highway Design

Street/highway design, drainage, flood control infrastructure

Building Construction

Commercial, institutional, residential & industrial construction

Water & Sewer Systems

Water supply pipelines, sewer design, waste management facilities

Surveying & Planning

Topographic surveys, site planning, development applications

OUR TARGET CLIENTELE & GROWTH STRATEGY

WHO WE SERVE

Education Institutions
Universities, colleges, schools & TTIs

NGOs & Cooperatives
International & local non-governmental organizations

Government Bodies
National & county government ministries, parastatals

Private Companies
Corporate entities, SACCOs & investment firms

Private Individuals
Homeowners and private estate developers

Real Estate Developers
Commercial & residential construction projects

GROWTH STRATEGY

Diversify
Introduce excellent new products and services across sectors

Profitability
Maintain reasonable and sustainable profits year on year

Staff Empowerment
Ongoing training, skills transfer and career development

Market Leadership
Become the #1 developer and contractor in the region

Geographic Expansion
Grow from Kenyan base to region-wide presence

HEALTH, SAFETY & COMPANY POLICIES

Health & Safety Policy

Safe & Hygienic Workplace

Regular health checks and safety inspections on all sites

In-House Training

Ongoing H&S training and competency development for all staff

Mentoring & Coaching

Identifying unsafe practices and boosting workplace morale

Legal Compliance

Full compliance with employment equity and legal requirements

WHY CHOOSE US?

Proven Track Record

17+ completed projects across Kenya

Multi-NCA Certified

Building, Water & Electrical contractor

Technical Expertise

Registered engineers & hydrogeologists

End-to-End Solutions

From survey to commissioning under one roof

Value for Money

Competitive pricing without compromising quality

24hr Quotation

Free written quote within 24 hours, always
